

# **INTERNSHIP MANAGEMENT SYSTEM (IMS)**

## **STUDENT PORTAL MODULE DOCUMENTATION**

---

### **PART 01 – FAYAZA**

#### **Student Registration, Verification, Account Activation & Password Management Module**

##### **Module Overview**

This module manages student registration, department verification, account activation, profile initialization, specialization selection, and password recovery.

---

##### **Functional Requirements**

###### **FR-F01 Student Account Request**

The system shall allow students to request an account by entering:

- First Name
- Last Name
- Student ID
- University Email Address

When the student submits the request:

- A registration request shall be sent to the relevant department.
  - The request status shall be marked as Pending Verification.
-

## **FR-F02 Department Verification**

The Department shall receive all student registration requests.

The Department shall verify whether:

- The Student ID exists in the university records.
- The University Email belongs to the student.
- An account has not already been created.

The Department may:

- Accept the request
  - Reject the request
- 

## **FR-F03 Account Approval Notification**

When a request is approved:

The system shall:

- Generate a temporary password.
- Create the student account.
- Send an activation email to the student's university email.

The email shall contain:

- Login URL
  - University Email
  - Temporary Password
- 

## **FR-F04 First-Time Login**

When the student clicks the activation link:

The system shall automatically:

- Open the login page.
- Auto-fill the university email.
- Allow login using the temporary password.

After successful login:

The student shall be redirected to the Password Setup Interface.

---

## **FR-F05 Password Setup**

The student shall:

- Enter New Password
- Enter Confirm Password

Validation Rules:

- Passwords must match.
- Password must satisfy security requirements.

After successful submission:

- The account status shall become Active.
  - Student profile setup shall begin.
- 

## **FR-F06 Initial Profile Setup**

The system shall automatically populate:

- First Name
- Last Name
- Student ID
- University Email

The student shall only select:

- Specialization

Available specializations shall be predefined by the department.

The student must:

- Select specialization
  - Tick confirmation checkbox
  - Submit
-

## **FR-F07 Specialization Locking**

Once confirmed:

- The specialization cannot be modified.
  - No edit functionality shall be available.
- 

## **FR-F08 Student Overview Page**

After profile completion:

The student shall be redirected to the Overview Page.

The page shall display:

- Full Name
- Student ID
- University Email
- Specialization
- Registration Status

Optional fields:

- GitHub Profile URL
- LinkedIn Profile URL

Students may update these optional fields at any time.

---

## **FR-F09 Forgot Password**

The system shall provide a Forgot Password option on the login page.

Process:

1. Student clicks Forgot Password.
2. Student enters University Email.
3. System sends Password Reset Link.
4. Student opens the link.
5. Student enters:
  - New Password
  - Confirm Password
6. Student saves the password.

After successful reset:

- Student shall be redirected to the Overview Page.
- 

## **Validation Rules**

- University email must be unique.
  - Student ID must be unique.
  - Duplicate accounts shall not be allowed.
  - Password confirmation must match.
  - Specialization cannot be changed after confirmation.
  - Email verification link shall expire after a predefined period.
- 

## **Non-Functional Requirements**

### **Security**

- Passwords shall be encrypted.
- Temporary passwords shall be randomly generated.
- Reset links shall be token-based.

### **Performance**

- Registration requests shall be processed within 3 seconds.
- Email notifications shall be generated automatically.

### **Reliability**

- Email delivery failures shall be logged.
  - Duplicate submissions shall be prevented.
- 

## **PART 02 – WIMANSA**

## **GPA Calculator Module**

### **Module Overview**

This module calculates GPA using semester-wise academic results.

---

## **Functional Requirements**

### **FR-W01 Subject Retrieval**

The system shall automatically display:

- Subject Code
- Subject Name
- Credit Value

for each semester.

Credits shall be retrieved from the database.

Students shall not modify credits.

---

### **FR-W02 Grade Entry**

Students shall enter only:

- Grade

Examples:

- A+
  - A
  - A-
  - B+
  - B
  - B-
  - C+
  - C
  - C-
  - D
  - E
- 

### **FR-W03 Grade Validation**

When a grade is entered:

The system shall validate it against:

- Academic database
- Authorized grade list

Invalid grades shall trigger:

"Invalid Grade Entered"

---

## **FR-W04 Optional Subject Handling**

For optional subjects:

The student shall:

- Add new row
- Enter Subject Code

The system shall:

- Search database
- Retrieve subject details
- Auto-fill credits

The student shall then enter the grade.

---

## **FR-W05 Subject Verification**

The system shall verify:

- Subject code exists.
- Subject belongs to the selected semester.

If not:

Error message shall be displayed.

---

## **FR-W06 GPA Calculation**

The system shall:

- Calculate Semester GPA
- Calculate Overall GPA

Using:

$$\text{GPA} = \Sigma(\text{Credit} \times \text{Grade Point}) / \Sigma(\text{Credits})$$

---

### **FR-W07 GPA Result Display**

The system shall display:

- Semester GPA
- Total Credits Earned
- Overall GPA

for all semesters.

---

## **Non-Functional Requirements**

### **Accuracy**

GPA calculations must be 100% accurate.

### **Performance**

Results shall be calculated within 2 seconds.

### **Reliability**

Subject and credit data shall be synchronized with university records.

---

## **PART 03 – FATHUSHA**

# Portfolio Management, Internship Status Tracking & Record Book Module

## Module Overview

This module manages student portfolios, internship tracking, offer letter submission, progress monitoring, and internship record book management.

---

## Functional Requirements

### FR-T01 Portfolio Upload

Students shall be able to upload:

- CV/Resume
  - Academic Projects
  - Certifications
  - Additional Portfolio Items
- 

### FR-T02 Portfolio Visibility

All uploaded portfolio details shall be visible to the Department.

---

### FR-T03 Internship Status Selection

Students shall select:

- I Have Been Selected
  - Not Selected
- 

### FR-T04 Internship Details Submission

If "I Have Been Selected" is chosen:

The following fields shall be unlocked:

- Company Name
  - Position
  - Internship Start Date
  - Offer Letter Upload
- 

## **FR-T05 Not Selected Handling**

If "Not Selected" is selected:

- Offer Letter Upload remains locked.
  - Internship detail fields remain disabled.
  - Appropriate warning message shall be displayed.
- 

## **FR-T06 Progress Tracker**

Progress Stages:

1. Placement Search
2. Pending Approval
3. Approved

If selected:

- Placement Search becomes active.
- Pending Approval becomes active.

After department approval:

- Approved stage becomes active.

Progress shall be displayed using color indicators.

---

## **FR-T07 Offer Letter Verification**

Department shall review uploaded offer letters.

Department may:

- Approve
- Reject

Only approved offer letters shall activate internship progression.

---

## **FR-T08 Internship Record Book Access**

Initially:

- Record Book access shall remain locked.

After offer letter approval:

- Record Book access shall be unlocked.
- 

## **FR-T09 Weekly Record Book Management**

Students shall:

- Enter weekly internship activities.
- Save draft entries.
- Edit draft entries.

Fields:

- Week Number
  - Start Date
  - End Date
  - Weekly Activities
- 

## **FR-T10 Weekly Editing Rules**

Students may edit records:

- Before submission
- Within the active week period

After submission:

- Editing shall not be allowed.
- 

## **FR-T11 Record Status Tracking**

Each weekly record shall display:

- Draft
- Edited
- Submitted

status.

---

## **FR-T12 Week Closure**

When the week end date is reached:

- The week shall automatically close.
  - Editing shall no longer be permitted.
- 

## **FR-T13 Report Download**

Students shall be able to generate and download:

- Weekly Reports
- Three-Week Summary Reports

The report shall be generated in PDF format.

---

# **Non-Functional Requirements**

## **Security**

Only authorized students shall access their records.

## **Performance**

File uploads shall complete within acceptable response times.

## **Reliability**

No record shall be lost after saving.

## **Availability**

Record book services shall be available 24/7.

---

# **Additional Functional Requirements – Internship Placement Rejection Handling**

## **FR-T14 Placement Rejection Notification**

If the Department rejects a placement request, the system shall:

- Change the placement status to Rejected.
- Store the rejection reason provided by the Department.
- Generate a notification for the student.

The student shall be able to view the rejection notification from:

- Internship Status Page
  - Dashboard Notifications
  - Navigation Bar Notification Panel
- 

## **FR-T15 Rejection Reason Display**

The system shall display the exact rejection reason provided by the Department.

Example Reasons:

- Unauthorized Placement
- Invalid Offer Letter
- Missing Required Information
- Incorrect Company Details
- Unapproved Internship Organization
- Other Department Comments

Example Message:

"Your internship placement request has been rejected by the Department.

Reason: Unauthorized Placement.

Please update your internship details and submit a valid placement request for review."

## **STUDENT PORTAL WORKFLOW SUMMARY**

1. Student submits registration request.
2. Department verifies request.
3. Account approved/rejected.
4. Activation email sent.
5. First-time login.
6. Password creation.
7. Profile setup.
8. Specialization confirmation.
9. Overview page access.
10. GPA calculations.
11. Portfolio uploads.
12. Internship status tracking.
13. Offer letter submission.
14. Department approval.
15. Record book access.
16. Weekly record updates.
17. Report generation and download.

# **PART 04 – DEPARTMENT PORTAL MODULE**

## **Department Verification, Student Monitoring, Placement Approval & Record Book Management**

---

### **Module Overview**

The Department Portal is responsible for managing student registration verification, monitoring student profiles, reviewing internship placements, approving offer letters, and supervising internship record books.

Department users are provided with university credentials by the System Administrator and can access all student-related information through a centralized dashboard.

---

## **Functional Requirements**

### **FR-D01 Department Login**

The system shall provide a login interface for Department users.

The login form shall contain:

- University Email
- Password
- Login Button

Department accounts shall be created only by the System Administrator.

The department user shall log in using:

- University Email
- System-generated Password

Upon successful authentication, the user shall be redirected to the Department Dashboard.

---

## **FR-D02 Dashboard Overview**

After login, the system shall display a dashboard containing summary statistics.

Dashboard widgets shall include:

### **Registration Requests**

Displays the total number of student registration requests.

Initially:

- Count = 0

The count shall increase whenever a student submits a registration request.

---

### **Student Details**

Displays the total number of completed student profiles.

Initially:

- Count = 0

The count shall increase when students:

- Complete account activation
  - Complete profile setup
  - Confirm specialization
- 

### **Pending Approvals**

Displays internship placement requests awaiting review.

Initially:

- Count = 0

The count shall increase when students submit:

- Internship Details
  - Offer Letter
- 

## **FR-D03 Registration Verification Management**

The Department shall be able to view all student registration requests.

Each request shall display:

- Student Name
  - Student ID
  - University Email
  - Request Date
  - Current Status
- 

## **FR-D04 Registration Request Filters**

The system shall provide filtering options.

Available Filters:

- Pending
- Accepted
- Rejected

The department shall be able to switch between filters dynamically.

---

## **FR-D05 Student Registration Verification**

The department shall review submitted registration requests.

Verification criteria:

- Student ID validity
- University Email validity
- Existing account availability

The department may:

- Accept Registration
- Reject Registration

---

## **FR-D06 Student Details Management**

The Department shall have access to all registered student profiles.

Displayed Information:

- Student Name
- Student ID
- University Email
- Specialization
- GPA
- Internship Status

---

## **FR-D07 Student Detail Filters**

The system shall provide filtering options based on:

### **Specialization**

Examples:

- Software Engineering
- Data Science
- Network Engineering

### **Internship Status**

Examples:

- Not Selected
- Pending Approval
- Approved

### **GPA**

Examples:

- GPA : lower to higher
  - GPA : higher to lower
- 

## **FR-D08 Student Profile Viewing**

The Department shall be able to:

- View Student Profile
- View Student CV

The system shall display uploaded portfolio information.

Examples:

- CV
  - Projects
  - Certifications
  - LinkedIn Profile
  - GitHub Profile
- 

## **FR-D09 Total Registered Students**

The system shall display:

Total Registered Students

The value shall update automatically when new students complete registration.

---

# **Internship Placement Approval Module**

## **FR-D10 Placement Review Queue**

The Department shall view all internship placement submissions.

Each submission shall display:

- Student Name
  - Company Name
  - Position
  - Submission Date
  - Current Status
- 

## **FR-D11 Placement Filters**

Available Filters:

- Pending Review
- Approved

The system shall allow switching between filters.

---

## **FR-D12 Placement Review**

When the Department selects Review Placement:

The following information shall be displayed:

- Student Name
- Company Name
- Position
- submission Date
- Uploaded Offer Letter

The Department shall be able to view the offer letter document.

---

## **FR-D13 Placement Approval**

The Department may approve a placement.

When approved:

- Placement Status = Approved
- Progress Tracker Approved Stage = Active
- Student Internship Record Book = Unlocked

The student shall immediately gain access to the Record Book module.

---

## **FR-D14 Placement Rejection**

The Department may reject a placement.

The system shall require a mandatory rejection reason.

Examples:

- Invalid Offer Letter
- Missing Information
- Incorrect Company Details
- Unauthorized Placement

The rejection reason shall be stored in the database.

---

## **FR-D15 Student Rejection Notification**

When a placement is rejected:

The student shall receive:

- Placement Rejected Status
- Rejection Reason

On the student side:

- Approved Progress Stage shall remain inactive.
- Record Book shall remain locked.

A notification message shall be displayed.

---

## **FR-D16 Re-Submission Support**

Students shall be allowed to:

- Update placement details
- Upload a new offer letter

- Re-submit for approval

The Department may review the updated submission.

---

## **Internship Record Book Monitoring**

### **FR-D17 Record Book Access**

The Department shall have access to all approved student record books.

---

### **FR-D18 Record Book Viewing**

The Department shall be able to view:

- Submitted Weeks
- Current Active Week
- Future Weeks

For each week:

- Week Number
  - Start Date
  - End Date
  - Activities
  - Status
- 

### **FR-D19 Record Status Monitoring**

The Department shall be able to view:

- Draft
- Edited
- Submitted

status of every weekly record.

---

## **FR-D20 Locked Week Management**

Students may request unlocking of a locked week.

The Department shall receive the request.

The Department may:

- Approve Unlock Request
  - Reject Unlock Request
- 

## **FR-D21 Week Unlocking**

When approved:

- The selected week shall become editable again.
- The student shall regain edit access.

The unlock action shall be recorded in the system log.

---

## **FR-D22 Weekly Progress Monitoring**

The Department shall be able to monitor:

- Total Weeks Completed
- Current Week Progress
- Pending Submissions
- Submitted Reports

for each student.

---

# **Non-Functional Requirements**

## **Security Requirements**

- Only authenticated department users shall access the portal.
- Passwords shall be encrypted.

- Role-based access control shall be enforced.
  - Student records shall be protected from unauthorized access.
- 

## **Performance Requirements**

- Dashboard statistics shall load within 3 seconds.
  - Filters shall return results within 2 seconds.
  - Offer letters shall open without significant delay.
- 

## **Reliability Requirements**

- Approval and rejection records shall not be lost.
  - All placement decisions shall be permanently logged.
  - Record book modifications shall maintain version history.
- 

## **Availability Requirements**

- Department Portal shall be available 24 hours per day.
  - The system shall support concurrent access by multiple department users.
- 

## **Audit & Tracking Requirements**

The system shall maintain logs for:

- Registration Approvals
- Registration Rejections
- Placement Approvals
- Placement Rejections
- Week Unlock Requests
- Record Book Access

Each log shall contain:

- User ID
- Action Performed
- Timestamp

- Related Student ID
- 

## **Department Portal Workflow Summary**

1. Department logs in.
2. Dashboard loads.
3. Registration requests are reviewed.
4. Student accounts are approved or rejected.
5. Student profiles become visible.
6. Placement submissions appear in Pending Approvals.
7. Offer letters are reviewed.
8. Placement is approved or rejected.
9. Approved students receive Record Book access.
10. Department monitors weekly records.
11. Unlock requests are reviewed.
12. Record book progress is continuously monitored.
